# PCI in High Bleeding Risk Patients

**Starhotel Rosa Grand – Milano**

**Wednesday 21st November, 2018**

**10h00**

**Scientific coordinators:**

**Prof. Giuseppe Tarantini** (Italy)

**Dr Giuseppe Musumeci** (Italy)

**Special guest:**

**Prof. Philip Urban** (Switzerland)

**Objectives:**

- *Identify current unmet needs in the diagnosis of High Bleeding Risk (HBR) patients*
- *Revisit existing evidence on the approach of HBR patients in the context of myocardial revascularization*
- *Bridge the gap between evidence and practice, identifying ways to integrate the holistic management of HBR patients in pre-procedural, intra-procedural and post-procedural settings*

**For registration and inquiries:**

Please contact your Biosensors' sales representative

*Educational event sponsored by Biosensors Europe SA  
as part of its Global Health Partnership program*

## TIP - TRANSCATHETER INNOVATION IN PRACTICE

21 November, Milano

### Faculty

10.00	Registration	
10.20	Welcome and Introduction	Giuseppe Musumeci Giuseppe Tarantini
10.30	Spectrum, classification and prognosis of bleeding in PCI patients	Giuseppe Tarantini
10.40	Identification of HBR patients in clinical practice	Alaide Chieffo
10.50	Lessons learned from LEADERS FREE	Philip Urban
11.05	Lessons learned from RUDI FREE	Carlo Briguori
11.15	Discussion	

### SESSION I Treatment strategies in patients with high ischemic & bleeding risk

*Moderators:* Philip Urban, Giuseppe Musumeci

*Panelists:* Ciro Mauro, Marco Mojoli, Fabio Tarantino

11.30	CASE 1 - ACS patient with active bleeding	Andrea Rognoni
11.55	CASE 2 - Patient with high risk CAD, atrial fibrillation, and high HAS-BLED score	Maurizio D'Urbano
12.20	Lecture 1 The conundrum of anticoagulation, PCI and DAPT. Preprocedural, intraprocedural and postprocedural planning & practical takeaway	Lorenzo Plinio Cirillo
12.30	Discussion	

### SESSION II PCI patients with high bleeding risk due to extra-cardiac conditions

*Moderators:* Giovanni Esposito, Philip Urban

*Panelists:* Battistina Castiglioni, Livio Giuliani, Corrado Lettieri

12.40	CASE 3 - Patient at high risk of GI bleed needing for PCI	Massimo Mancone
13.05	Lunch Break	
14.15	CASE 4 - Patient awaiting non-cardiac surgery	Giulia Masiero
14.40	CASE 5 - Concealed life-threatening bleeding	Alessio La Manna
15.05	Lecture 2 Antiplatelet regimen, duration, and switching in HBR patients. DAPT Guidelines in 2018	Pietro Vandoni
15.15	Discussion	

### SESSION III Tailoring Coronary Interventions to HBR patients

*Moderators:* Carlo Briguori, Alfredo Marchese

*Panelists:* Plinio Lorenzo Cirillo, Alessio Mattesini, Stefano Rigattieri

15.25	CASE 6 - Procedural optimization in HBR-patient PCI: complex lesions	Emilio Di Lorenzo
15.50	CASE 7 - Procedural optimization in HBR-patient PCI: multivessel disease	Ferdinando Varbella
16.15	Lecture 3 Available evidence and on ongoing trials of coronary stenting and very short DAPT for HBR Patients	Italo Porto
16.25	Discussion	
16.30	Final remarks	Giuseppe Musumeci Giuseppe Tarantini
